How Sump Pumps Work & Backup Protection

Sump pumps remove water collected in basement sump pits to prevent flooding

Automatically activate when water rises to a critical level

Battery backup systems provide protection during electrical outages

TROSS CONSTRUCTION

01

Water collects in the sump pit

02

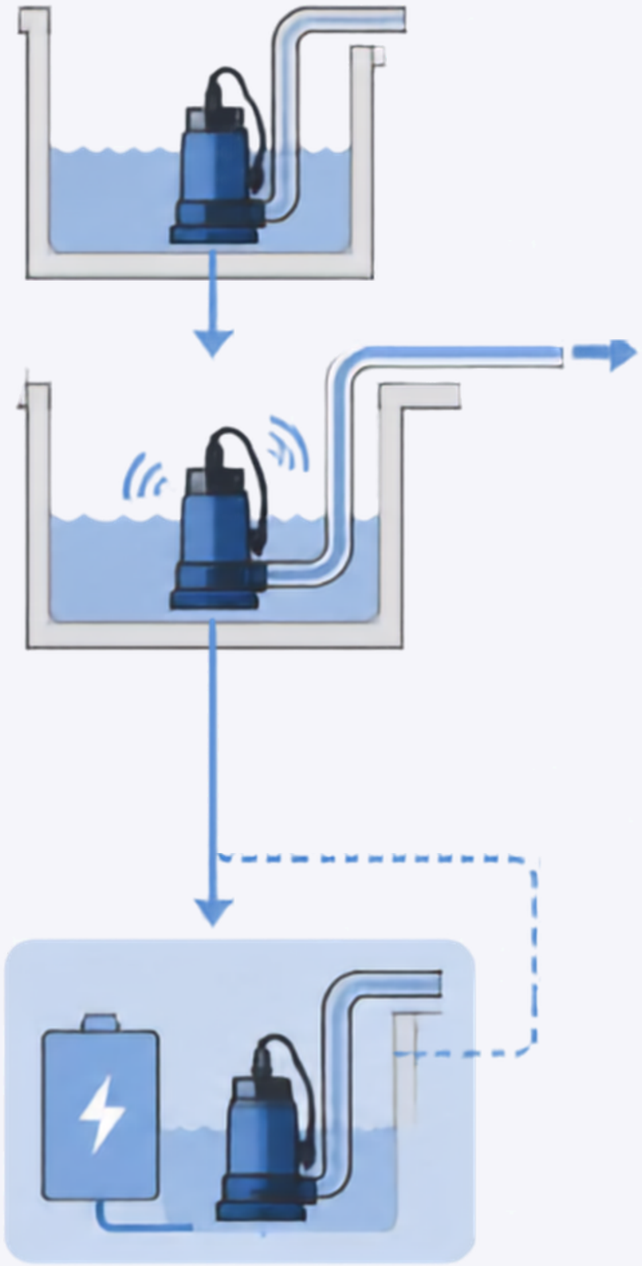
Pump turns on automatically

03

Water is pumped away from your home

04

Battery backup keeps working during outages



Signs You Need a Sump Pump & Installation Process

SIGNS YOU NEED A SUMP PUMP

Pooling water or damp floors after rainfall

Strange noises or pump not turning on

Constant running or frequent cycling

Pump older than 7-10 years or no pump installed

History of basement flooding

OUR INSTALLATION PROCESS

1. Site assessment to determine system needs
2. Pump selection based on home requirements
3. Sump pit preparation for pump placement
4. Pump and discharge pipe installation
5. Optional battery backup system installation
6. Testing and verification to ensure proper operation
